

FIFTY YEARS IN SCIENCE AND RELIGION

IAN G. BARBOUR AND
HIS LEGACY

EDITED BY
ROBERT JOHN RUSSELL

Fifty Years in Science and Religion

Ian G. Barbour and his Legacy

Edited by **Robert John Russell**, The Center for Theology and the Natural Sciences, USA

Ashgate Science and Religion Series

'Ian Barbour's distinguished and distinctive contribution to the increasingly creative dialogue between science and religion is, in this volume, celebrated by an appropriately matching collection of distinguished and distinctive essays on the variegated themes of his work. It provides valuable surveys of the past and insightful pointers to the future of this dialogue which is so essential for the vitality, fruitfulness and beneficence of both science and religion.'

Arthur Peacocke, Former Director of the Ian Ramsey Centre, University of Oxford

'Ian Barbour is an unparalleled leader in the contemporary dialogue between science and religion. This volume is a wonderful witness from key scholars in the field to the breadth, depth and integrity of his contribution. It also offers fresh and exciting insights on the diverse range of key issues we face as we move into a new moment in this dialogue.'

Denis Edwards, School of Theology, Flinders University, South Australia

Fifty Years in Science and Religion brings together nineteen leading scholars in the field to offer an appreciative yet critical assessment of the impact of Barbour's work on science and religion and to point ahead towards future critical areas, goals and tasks that await new research and visionary exploration. This book includes a unique autobiography by Barbour in which for the first time he shares and reflects on his life and work, and a detailed bibliography of Barbour's works. Together, the authors demonstrate how Barbour's writings and the hundreds of scholars who have now become part of the field have changed the course of intellectual history in the West.
